PHP Assignment 2

Writing the web application using PHP + MySQL to perform the following requirements:

1. Designing the database **PhpDB** with a table named **tbEmployee** as follows

Name	Type	Null	Descriptions
empID	varchar(3), primary key	no	
password	varchar(30)	no	
fullname	varchar(50)	no	
email	varchar(30)	no	unique
role	tinyint	no	Input only 1 or 2
Salary	int	no	Between 100 - 10000

2. Create the **login.php** page to ask user to login to the system.

   a. If login with id and password exists in the employee table and role = 1, the application will display the **staff.php** page

   b. If login with id and password exists in the employee table and role = 2, the application will display the **admin.php** page

   c. Otherwise, display the error message

3. Create the **staff.php** page as shown below

ID	Full name	Email
E01	John Henry	henry@gmail.com
E02	Maria Clark	maria@yahoo.com
E03	Barbara Palvin	barbara@yahoo.com
E04	Tommy Hilfiger	tommy@gmail.com

4. Create the **admin.php** page as shown below:

Add new

ID	Full name	Email	Role	Actions
E01	John Henry	henry@gmail.com	1	Edit | Delete
E02	Maria Clark	maria@yahoo.com	1	Edit | Delete
E03	Barbara Palvin	barbara@yahoo.com	2	Edit | Delete
E04	Tommy Hilfiger	tommy@gmail.com	2	Edit | Delete
